

Investing Amid Geopolitical and Economic Volatility and the Rise of Artificial Intelligence

3 NOVEMBER 2023

The Forum Hotel

(next to University of Virginia Darden
School of Business)

DARDEN

Richard A. Mayo
Center for Asset Management

EVENT SPONSORSHIP OPPORTUNITIES

For sixteen years, the University of Virginia Investing Conference (UVIC), hosted by Darden's Richard A. Mayo Center for Asset Management, has gathered leading industry practitioners and the University and Darden School communities to provide unique industry insights.

This year, UVIC will explore investing in a world of slowing economic growth, geopolitical stress, and a rapid rise in artificial intelligence applications. We will focus attention on how these issues may converge to shape the future of the global economy and markets. Program speakers will also detail approaches and ideas for how investors might position themselves for success over the coming years.

2023 Session Topics Include:

- "How Machine Learning is Reshaping Investing"
- "The Future of Private Equity"
- "The Disruptive Future of Artificial Intelligence"
- Keynote Speaker, Former Secretary of Defense, Chuck Hagel

Sponsorship opportunities for the 16th University of Virginia Investing Conference present visibility, recognition, and networking benefit for sponsors at various levels.
